## Design Proposal - *Kashmir*

- The Kashmir motif is the heart of the line. Interlinked motifs form long pendant and earrings. A group of several tiny motifs are combined together into round pendant. The use of swarosky crystal creates colorful effects. The crystals are used among the motives or with pave', to cover the kashmir patterns. The combinations of patterns and crystals generates endless design possibilities and different sizes of the same design have different uses: pendants, earrings, part of necklaces, charms of bracelets.
- Kashmir is a joyful and young line for daily wear. The semiprecious stones and crystal pave versions of the designs can be worn for formal attires.
- Price range: 50-200 US\$

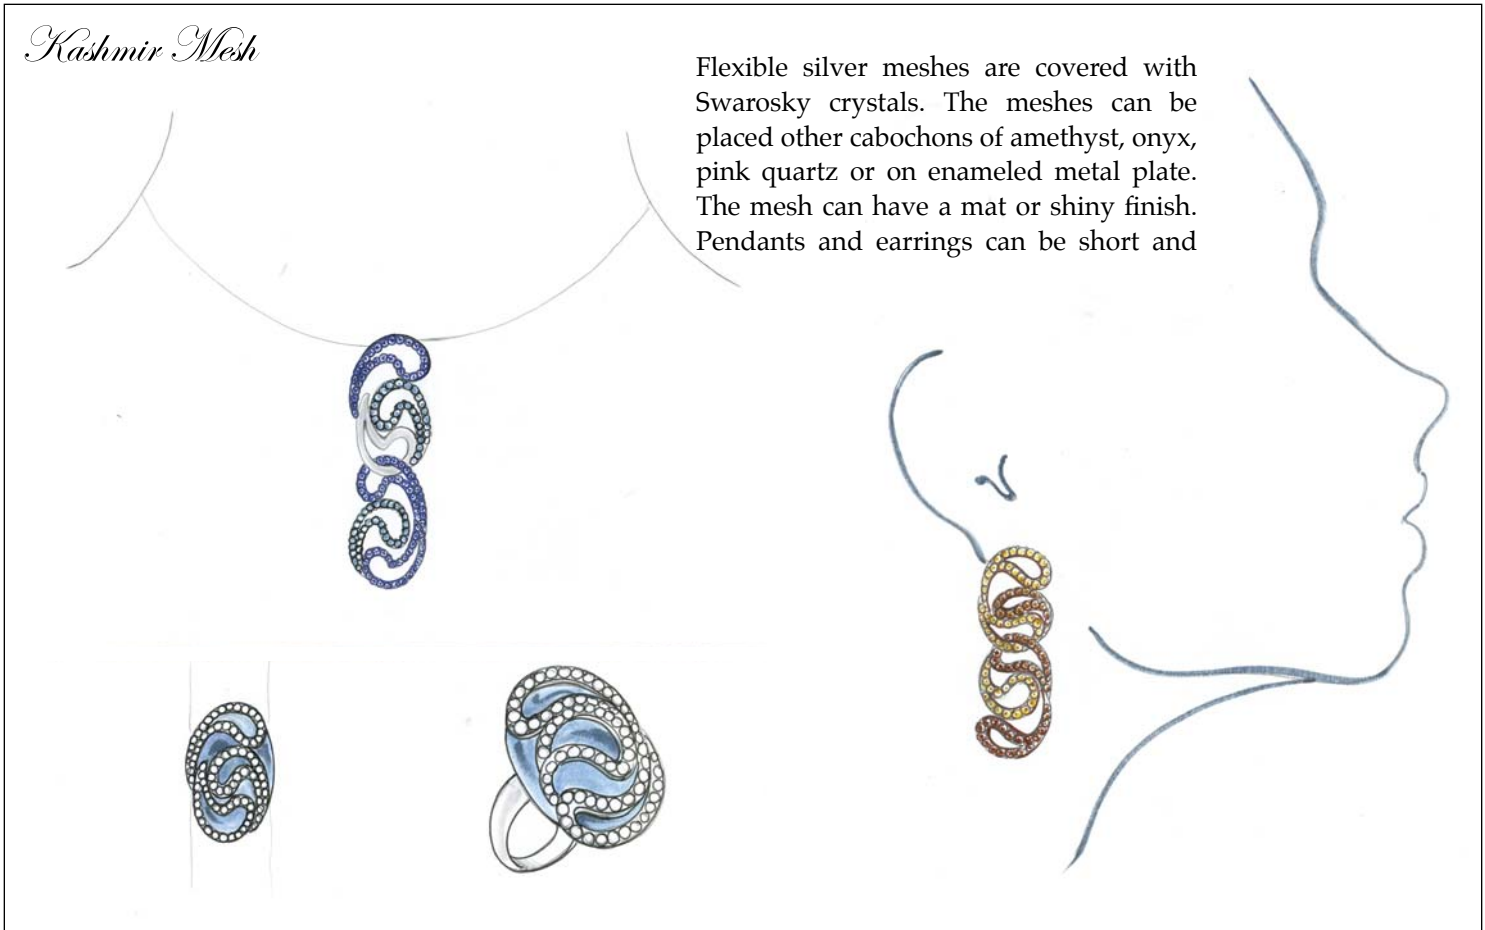

### *Kashmir Moon*

A thin metal plate is enriched by colorful swarosky crystals. The plate can have shiny or mat finish. It can be placed on a semi-precious stone or an enameled metal plate.

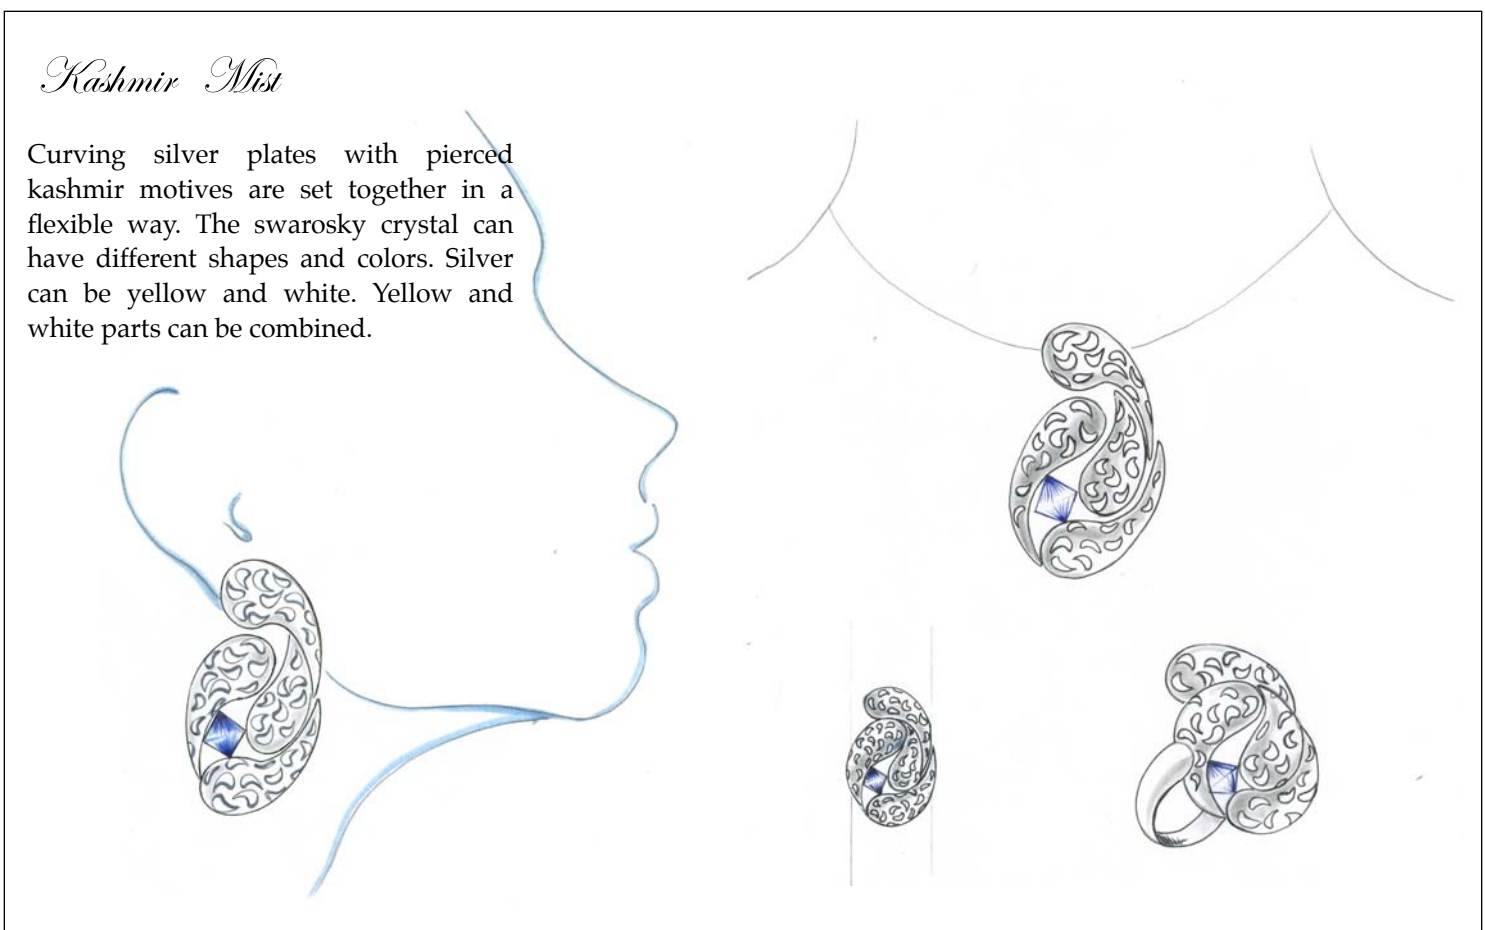

*Kashmir Mesh*

Flexible silver meshes are covered with Swarosky crystals. The meshes can be placed other cabochons of amethyst, onyx, pink quartz or on enameled metal plate. The mesh can have a mat or shiny finish. Pendants and earrings can be short and

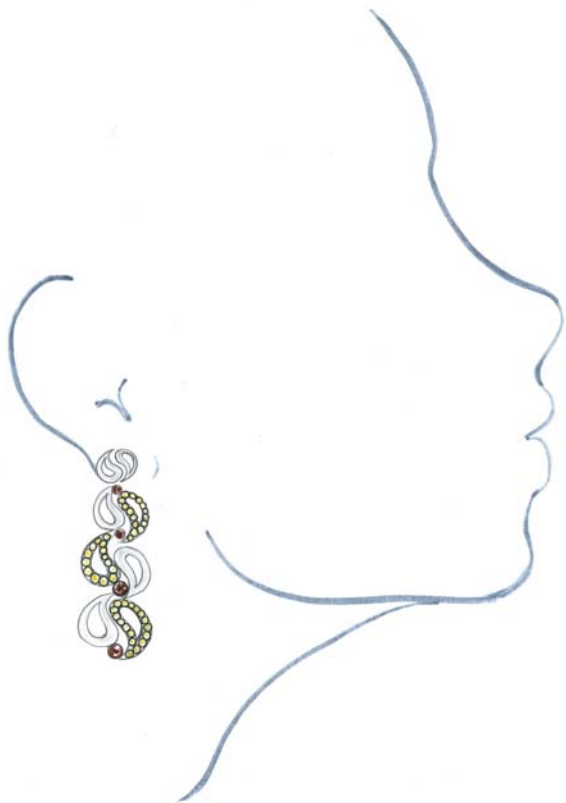

*Kashmir Mist*

Curving silver plates with pierced kashmir motives are set together in a flexible way. The swarosky crystal can have different shapes and colors. Silver can be yellow and white. Yellow and white parts can be combined.

*Kashmir lines*

Other examples of design's lines based on the kashmir motif, with and without a semi-precious stones or an enameled metal plate as base.

*Kashmir Passion*

The curving silver heart shape is covered by crystal pave' and mat finish kashmir motifs. Alternatively, the silver heart shape can be mat finish and the kashmir motifs covered by crystal pave'.
